

Mowing Schedule 2024

Mahoning valley

March 30	Oak Forest
April 6	Shiloh & Fairview
April 13	Center
April 20	Community
April 27	Clarksburg
May 4	Liberty
May 6	New Testament & Centerville
May 11	Raleigh & Plum Creek
May 18	The Fountain
May 25	Glenwood & Batesville
June 8	Cadiz & Hannegan
June 15	Wilkinson
June 22	New Point
June 29	Morristown & Cambridge City
July 6	Rushville & Arlington
July 13	Jacksonburg & Greens Fork
July 20	Ben Davis
July 27	Mt. Pisgah

August 3	Liberty
August 10	The Fountain
August 17	Moscow
August 24	Bethany
August 31	First Christian Greensburg
September 7	Ben Davis & New Heights
September 13	Center
September 21	Wilkinson
September 28	Batesville & Glenwood
October 5	Mt. Pisgah
October 12	Raleigh & Hannegan
October 19	New Point
October 26	Sulphur Springs
November 2	Cadiz

Mowing Schedule 2024 Mahoning valley

Guidelines

- -Approximately 20-25 acres mowable
- -Zero-turn or “lawn” tractors” of any width are acceptable. Although anything wider than 72” will not be able to make it to the backside of the camp over the bridge. Zero-turn mowers are more desirable because they are easier to maneuver in some areas. The camp owns 3-60” zero-turn country clipper mowers controlled with a single joystick. They can be used if someone is familiar with those controls and comfortable using that machine. Let me know so I can have them fueled and ready to go.
- -The more mowers, the easier the task. But a typical mowing crew usually has at least 4 mowers and 1 or 2 grass weed eaters
- -Depending on the mowing season, crews usually arrive between 8-9 am. If there’s a question whether it’s too wet, stormy, etc, you can call *Jeremy Souders @ 765-571-2811* to get the latest updates on conditions. Also, call if you wonder if the grass is not tall enough to mow due to lack of rain.
- Bring your lunch/water. Some crews meet at a local restaurant, have breakfast, and come out to mow. Bathrooms are available and open in the dining hall.
- The camp is divided by Ben Davis Creek. A bridge connects the 2 sections. It is only big enough to support a mower with a 72” deck or less.
- -I will try to send a “rough” map that we have to help show what areas need to be mowed weekly.
- -We ask that all mowers set the mowing depth to 3” and coordinate with each other to ensure that mowers that might be mowing in the same area cut at approximately the same height.
- -There is a section of grass across from the main entrance that does not belong to the camp, but we ask that groups mow it to keep the front area looking nice. It is on the north side of the road. The grass helps a local farmer so he doesn’t have to bring in his equipment.
